FIRST TIME ON THIS PHONE

USB already connected

Illustrated guide • Not actual screenshots

1 FIND THE INSTALLER

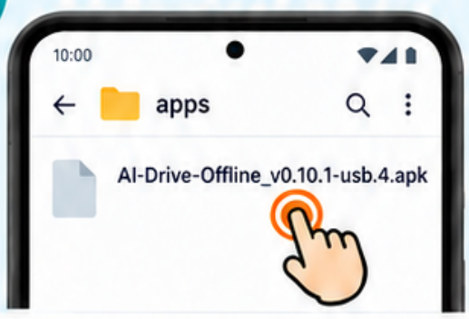

Open your phone's Files app.

Open the USB drive.

Android-Drive-Kit → apps

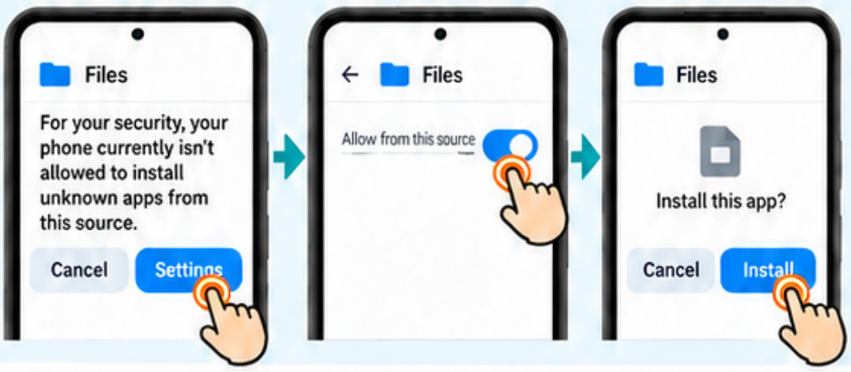

2 TAP THE APK

AI-Drive-Offline_v0.10.1-usb.4.apk

Tap this file to begin installation.

3 ALLOW THIS INSTALL

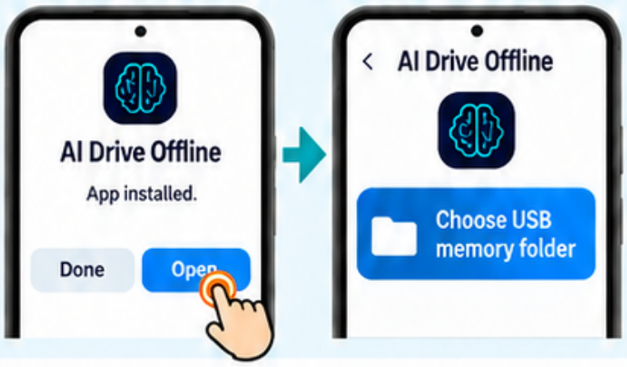

If Android asks:

Settings → "Allow from this source"

Back → Install

Allow only the Files app opening this APK.

4 OPEN & CONTINUE

Tap "**Open**".

AI Drive **Offline** opens.

Continue with the next picture guide: connect USB memory, then choose a model.

Install once per phone. No account needed.

Android requires you to install and open the app manually.
Plugging in the drive does not start the app automatically.

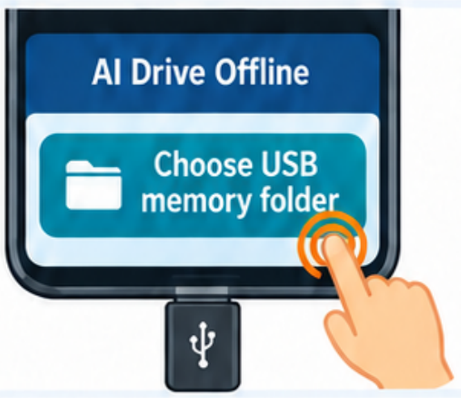

AFTER YOU PLUG IT IN

AI Drive Offline · Android

Illustrated guide · Not actual screenshots

Keep the USB drive connected while chatting.

1

OPEN & CONNECT

Open AI Drive Offline.
Tap “Choose USB memory folder”.
USB drive → Android-Drive-Kit
Tap “Use this folder” → “Allow”.
Wait for “Drive connected” and a verified save.

2

CHOOSE YOUR MODEL

Tap “Choose a model”.
Tap the document + icon.
Tap “Use External Model”.
Open USB → Android-Drive-Kit → models.
Choose the .gguf file.

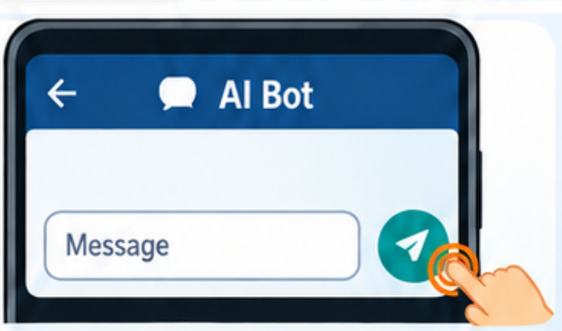

3

LOAD THE MODEL

Open Settings at the bottom.
Set “Max Context” to 1024.
Set “Threads” to 2 and “Batch” to 16.
Go to Models. Tap the circular ▶.
Wait for “Model Loaded”.

4

START CHATTING

Back → Chats → AI Bot
Type your message. Tap Send.
Your drive stays connected.

5

SAVE & UNPLUG

Open Drive Memory.
Tap “Save and disconnect”. Wait.
Use your phone’s Eject option.
Then unplug the USB drive.

No account or subscription needed for local chat.

Open the app manually after connecting the drive.
